Test Title

User is not able to signup if he/she enters a first name with three charachters

The location of the loader in the login page is wrong

No available task message will appear when adding a total of 5 tasks

UI appears inconsistent across different devices

Saved login doesn't persist across browsers

Test Steps

1- Enter a first name with "HAT".

2- Fill a correct last name.

3- Fill a correct email formate, and the email should not be registered in the database.

4- Fill a correct password.

5- Fill a correct confirm password.

6- Click on signup button

1- Go to login page

2- Fill the email

3- Fill the password

4- Click on login

5- Check the loader

1- Go to Todos Page

2- Add 5 tasks

1. Open the ToDo page using:

a. Mobile device (e.g., Chrome DevTools Mobile View)

b. Tablet device

c. Desktop

1. Register and login using Google Chrome

2. Open the same app on Microsoft Edge or Firefox

3. Check if user is still logged in or has to re-login

Expected result

Should be able to signup correctly

The loader should appear correctly in the correct location

No available tasks should not be visible

Layout should remain visually consistent and user-friendly across all screen sizes

User session should persist or behave consistently across browsers

This error message was displayed "First Name is required, and it should be more t

The loader will be displayed in a wrong location
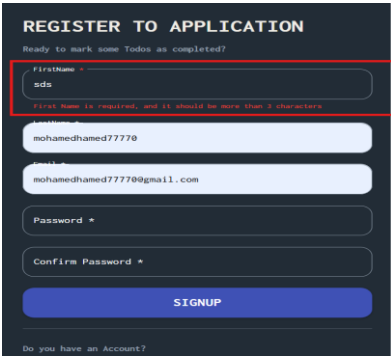

No available task is visible

On mobile, components are either too small or misaligned compared to desktop.

Login/session does not persist between browsers (e.g., logged in on Chrome, but
